Cath Hodsman 'Dragonflies'

Wednesday 10th May 2017 10am - 3pm

Cath is a Wildlife and Natural History artist with her love and speciality in insects. She is a well respected tutor and enjoys sharing her passion with others. Cath will take us through the wonder of the dragonfly with the use of microscopes with the aim of transferring the beauty seen into our own picture.

Cath is renowned for her detailed work but do not let that put you off as she knows some prefer a looser style and is happy for people to work for their own enjoyment.
